

Warranty

Three Year Limited Warranty

This Samcorp Arms Mfg. firearm is warranted for **three years** from the date of purchase against defects in material and workmanship. All parts and labor or replacement at our option are covered.

Government fees, damage caused by failure to perform normal maintenance, sales outside the United States, damage due to high velocity, high pressure, reloaded, or other non-standard ammunition, or any unauthorized repair, modification, misuse, abuse, or alteration of the product is not covered by this limited warranty.

Any implied warranties, including the implied warranties of merchantability and fitness for a particular purpose, are limited to one year from date of purchase. Consequential or incidental damages and/or expenses, or any other expenses are not covered by this warranty.

To obtain warranty performance send your firearm with proof of retail purchase, freight prepaid to:

Samcorp Arms Mfg.
1857 Commander Drive
Lake Havasu City, AZ. 86403

Alterations & Modifications Warning

Altering or modifying parts is dangerous and will void the warranty. This rifle was manufactured to perform properly with the original parts as designed. It is your duty to make sure any parts you buy are made for this rifle and are installed correctly and that neither the originals nor the replacements are altered or changed. Your S.A.M. rifle is a complex precision tool with many parts that must relate correctly with other parts in order for proper and safe operation. Putting a rifle together wrong or with incorrect or modified parts can result in a damaged rifle, serious personal injury or death to you and others through malfunction. Always have a qualified gunsmith work on your rifle or at least check any work not performed by a gunsmith.

Barrel Information Warning

To achieve the best results for accuracy you should clean the chamber and bore after every 10 rounds up to 100 rounds. It usually takes about 200 rounds per barrel for optimum accuracy. Please keep in mind that our barrels are production barrels, not custom barrels. Accuracy is dependent upon many factors such as bullet weight, powder load, rifling twist, rifling lands, operator technique, etc. Our production barrels have achieved anywhere from 1/8" to 1 1/2" M.O.A.. Obviously, we would hope that every production barrel would shoot 1/8" M.O.A., but with all of the above factors, we cannot guarantee a specific group size. NOTE: Using reloaded ammunition will void warranty. Modifying chamber or barrel voids warranty. This includes re-reaming of chamber, re-turning barrel to a lesser diameter and/or re-threading barrel for compensator or attachments.
